

# MONUMENT SIGNS

Often the best choice of exterior signage for non-retail environments, Akers Signs has been producing the finest monument signs in Ohio for decades. We have skilled masons on our installation team who produce fully masoned or faux masoned bases—to expertly fashion your signage identity.

As many zoning jurisdictions restrict the height of signs, monument signs are ground-mounted—complimenting a more refined and professional building appearance. Because your monument sign is seen at eye level, it is important it has a well-designed and unique personality reflecting the culture of your organization, while standing out from the crowd.
